Javascript
VCS with GIT
Thymeleaf
TDD
Java SE
MYSQL

Spring Boot Framework
jQuery
Object Oriented
Programming
Java EE (Servlets, JSP)

EXPOSURE

Python
Javascript React
Adobe Photoshop

DEVELOPMENT PROJECTS

ADLISTER JAN 2020

Adlister is a full-stack web application created with Java using MVC and utilizes MySQL for database storage. Users can login, create, edit, and delete posts.

WEATHER-MAP API DEC 2019

Weathermap users can get five day forecast via searchbox or drag and drop marker. This is achieved by an AJAX request to both Mapbox and DarkSky APIs.

AJAX STORE NOV 2019

Implemented jQuery with AJAX to update and display store items without reloading entire webpage

DESIGN PROJECT OCT 2019

Built a responsive site using Bootstrap's grid system. This website transitions seamlessly from mobile friendly to full desktop view.
